***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

Tomihata et al. *Journal of Biomedical Materials Research* (1997), Vol. 37, pages 243-251 (Tomihata) is the closest related prior art. Tomihata discloses a cross-linked HA film containing amide and ester bonds (pages 247-248). L-Lysine methyl ester (crosslinking agent 1) was added to an 80 vol % ethanol / 20 vol % water mixture and the crosslinking of HA was allowed to proceed in the medium in the presence of 10 mM water-soluble carbodiimide (crosslinking agent 2). It would not have been obvious to one of ordinary skill in the art at the time of the invention to modify the teachings of Tomihata (the use of alternative crosslinking agents and formation of ether bonds).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
